

Mean Platelet Mass (MPM)

The standard deviation (SD) of MPM is 0.0946 pg. Mean MPM is higher in males by 0.0444 SD, but the difference is not significant ($p = 0.108$, FWER = 0.431). MPM is not significantly ($p = 0.0245$, FWER = 0.0734) affected by age. The effect of age on MPM differs significantly by sex ($p = 0.004$, FWER = 0.000286). In females MPM changes with age at a rate of -0.00619 SD per month, and in males it changes at a rate of -0.0247 SD per month.
